

Learning Intention: We are learning to match objects to numbers.

Activity One: Treasure Hunt

Warming Up: [Penguin Counting](#)

1. Pick a number.
2. Can you find that number of blue objects?
3. Write in a circle on paper or a whiteboard.
4. Draw the objects you found around your number.
5. Then simply choose another number and another colour.

Scroll through the following pages to find more activities.

Learning Intention: We are learning to add numbers.

Activity Two: Adding with Dice

Warming Up: [Workout to 20](#)

1. Roll 2 dice that have dots.
2. Have your child add the dots together. At this age most children will add all the dots to get the answer.

Extension

Have your child draw the dots using the + sign and the = sign or write the numbers in an addition equation i.e. $1 + 6 = 7$

Learning Intention: We are learning to identify numbers.

Activity Three: Take away with Dice

Warming Up: [Count Down to Blast Off 10](#)

1. Roll two dice with dots.
2. Add the dots together, then take one dice and put it to the side.
3. Ask, when I take away these dots, how many are left?

Extension: Have your child record their take away using the - sign and the = sign, using the dots or the numbers i.e. $9 - 5 = 4$

Learning Intention: We are learning to understand measuring.

Activity Three: Measuring Scavenger Hunt

Warming Up: [Count Back Cat 20](#)

1. Give your child some preset lengths. Use a ruler or tape measure to measure 5cm or 7cm etc and make out of wool or card or whatever is handy in your home. You could also mark the measure on a ruler or tape.
2. Can you find 3 things or 5 things that are this long?
3. The child can draw or take photos of what they find and say how long they are.
